

The Communication Plan

The Communication Plan

This plan says how the project team is going to communicate with lots of different people about how the Learning Disability Transformation project is going and what we are doing.

We want to make sure everyone understands what the project is about and what we are trying to do.

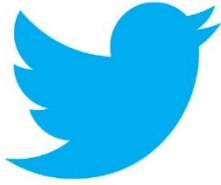

We can communicate in lots of different ways.

We want to make sure the right person has the right message at the right time.

We are going to have a facebook page where we share information.

We are going to have a twitter account where we share information.

We have created a Logo for the project, which will be displayed on all the information we communicate.

We will have regular events where we can all get together to share what the project is doing.

Here is a picture at our recent Launch event in Venue Cymru.

We will produce regular newsletters and bulletins for everyone to read. These bulletins will be produced in easy read and will be available in Welsh and English.

We are also going to post information on the website – Here is the link
<https://www.northwalescollaborative.wales/learning-disabilities/>

We want to know how well we are communicating with everyone so we will ask for feedback.

You can let us know by emailing at Learning.disability.transformation@flintshire.gov.uk

You might want to ask your family, a carer or a friend to help you send us an email.
